

The voice of our world can be heard in your world through many vessels of communication. Our existence is the only reality that the messages should embrace. It has been said by many souls on the earth that the reality of this world is greater than the reality of life on earth. Delusions do not exist where life is eternal for that is the ultimate gift a soul can expect. The pureness comes from the almighty peace

and realisation of the vastness
of the universe of the Divine.
Mankind has lost its way
on earth due to the blindness
it suffers for sight of
the bigger picture. All
beings on earth have
intelligence offered at
equal quantities, like
water in the oceans. Yet
how much is consumed is
determined by the individual
of the greater part. So
many people living on
earth will realise the
gift they had, after they

reach the light once more.
Time only matters for those
being washed along in the
flow of it. Yet, united
with the Divine force
after the gift of life on
earth has been removed,
these souls wake to
the greatest realisation.
Life is life and there is
nothing to remove it.
Mankind has learnt to
embrace their intelligence
only for self gain rather
than the greater good.
like drops of water always

from their source, they
live with disregard for
their purpose and their
originality.

The great source of
life, is tolerant, ever giving
and within all that
exists. It is the wise that
are aware of it.

Open your arms, your
eyes and your mind like
doors to greet the all
present force, rather than
closing everything and
creating a life of isolation
void of the greater good.

The world is not in peril,
only those blind to the
greatest knowledge born
of the Divine.

When the sun sets each
day, it is only the foolish
that believe beyond any
reason that it will rise
again. Though the sun
will indeed rise, not all
will be there to appreciate
it. Their lives naturally
end through the frailties
of a mortal life, only
to discover their lives
were always greater than

their appreciation had
diminished.

No being alive on earth
will ever know when their
next breathe will be their
last breathe.

Learn to challenge your
understanding of what is
and seek out what is
unknown.

God be with you, today
and always.
